

BAGGAGE MISHAPS

Savannah, one of three girls representing their country as Miss Panama, Miss France, and Miss Zambia, got distracted when her plane arrived at East Central Airport. Now she's at Lost and Found with two other girls who, by coincidence, are the other country representatives, each waiting to retrieve one lost piece of luggage of a different colour - black, green or yellow. Each girl is travelling from her home country to that of one of the other girls. Because this is Logic Land, the unlikelihood of the girls actually sharing the same airport is not of any concern in solving this puzzle. From the clues, for each girl, can you determine her title, her destination and the colour of her suitcase?

1. The three girls are Savannah, the American with the yellow suitcase and the one travelling to America.
2. Carmelita wants her suitcase to stand out, so she is not the person with the black suitcase.
3. Of the girl with the lovely yellow suitcase and Savannah, one is travelling to Panama and the other is the American citizen.
4. Gloria is neither the American citizen nor the one going to France, and she does not have a black suitcase.

	Miss Panama	Miss France	Miss America	France	Panama	America	Green	Black	Yellow
